#### **DETAILED ACTION**

## Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns,"

"The disclosure defined by this invention," "The disclosure describes," etc.

2. The instant abstract is too long. Appropriate correction is required...

### Claim Objections

3. Claims 1 and 2 are objected to because of the following informalities:

In claim 1, line 6, the phrase "and has a first intra-feature noise metric exceeds" should be amended to recite "and has a first intra-noise metric that exceeds."

In claim 2, line 2, the phrase "intra-feature standard deviation said second" should be amended to recite "intra-feature standard deviation and said second."

Appropriate correction is required.

## Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 5. Claims 2, 5, and 7-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 6. Claims 7-19 are indefinite for recitation in claims 7, 11, and 14 of methods in which features have both a higher intensity and a lower intensity relative to a toggle point, which is logically impossible. The rejections would be overcome by amending independent claims 7, 11, and 14 to recite method in which the features are alternatively higher or lower than the toggle point in intensity, as described in the specification at page 12.
- 7. Claim 2 recites the limitation "said second intra-feature noise value" in line 2. There is insufficient antecedent basis for this limitation in the claim. The rejection would be overcome by amending claim 2 to recite "said second intra-feature noise metric."
- 8. Claim 5 recites the limitation "said toggle point" in line 1. There is insufficient antecedent basis for this limitation in the claim. The rejection would be overcome by amending claim 5 to depend from claim 4.

### Allowable Subject Matter

9. Claims 3, 4, 6, and 20-23 are objected to as being dependent upon an objected claim (independent claim 1), but would be allowable if the objection to claim 1 were overcome.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Brusca whose telephone number is (517) 272-0714. The examiner can normally be reached on M-F 8:30-5:00.

Application/Control Number: 10/072,761 Page 4

Art Unit: 1631

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on (517) 272-0722. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308-0196.
